

Case Study No. 7

CHALLENGE CONDITIONS: *B. subtilis* spores were added to 70% IPA to be used during the fills for glove sanitization. The alcohol was liberally sprayed of operator's gloves during the fills. The concentration of spores in the alcohol after the fills was 3.8×10^5 per ml.

FILL CONDITIONS: Two media fills performed during the first week of the course on October 4, 2001.
